

REMARKS:

- 1) In view of the accompanying Request for Continued Examination (RCE), the Final status of the Office Action of March 17, 2009 shall be withdrawn, and the examination shall be continued on the basis of the present amended claims and remarks.
- 2) Referring to item 4) of the Office Action Summary, please note that claim 5 is also still pending, and is withdrawn from consideration. Namely, claim 5 has not been canceled.
- 3) The claims have been amended as follows.

Independent claim 1 has been amended editorially to change the term "bond contact bearer" to the art-recognized term --bond contact terminal--. Claim 1 has been amended substantively to additionally recite that the bond contact terminal has a bond contact area adapted to establish an electrical bond connection, and that the supporting body is arranged and positioned so that the bond contact area is located in an area of the supporting body projected in a direction in which the supporting body exerts the pretension force onto the bond contact terminal. This feature is supported in the written description and drawings, for example see the Substitute Specification filed on November 12, 2008, at page 2 line 23 to page 3 line 3, page 5 lines 17 to 19, page 6 lines 14 to 16, as well as claim 5 and 6.
